# Welcome to Your Organic Garden Journey!

You're just a few steps away from joining something extraordinary. Growing your own food isn't just about cultivating crops; it's about fostering community and reaping a harvest of shared experiences.

There's something truly special about growing your own food—it not only supports your immune system but also lets you revel in the beauty of an edible landscape while taking control of the quality of your produce.

## **Benefits of Your Organic Garden:**

- Immune Support: Homegrown produce contributes to a healthier you and a healthier family.
- Quality Control: Take control of your produce's quality, ensuring everything is free of chemicals and pesticides.
- Convenience: Enjoy the ease of having your own garden right in your backyard or any available space with direct sunlight.
- Cost-Effective: Save on grocery bills while reaping the rewards of your flourishing garden.

I genuinely believe that everyone can grow their own food, and I'm thrilled to share this privilege with you. Let's Grow Together!

Cheers,

*Nirit Tayas Zamir*

## Getting Started: Your Organic Garden Journey

### Step 1: Free Intro Call

Begin your organic garden journey with a complimentary short introductory call. This is our chance to get to know each other and discuss your aspirations for the perfect garden.

### Step 2: Garden Design - Tailored to You.....\$250

Our Garden Design service is a crucial step in crafting the ideal organic garden for your needs. It involves two essential components:

1. **Dietary Needs Assessment:** Your garden should mirror your dietary preferences. During this phase, we work closely to understand your dietary needs, ensuring that your garden produces the perfect assortment of organic produce tailored just for you.
2. **Space Measurement and Evaluation:** A key aspect of our Garden Design is assessing the space available. We'll visit your home or apartment to identify areas with direct sunlight exposure, evaluate water access, ground conditions, and more. This ensures your garden thrives in the best possible environment.

**Investment:** The Garden Design/Consultation service comes with a fee of \$250. **However, if you choose to proceed with installing a full garden through Jordan's Garden, we'll rebate \$150 back from the initial \$250 you invested in the Garden Design/Consultation.**

## Step 3: Choose Your Growing Option

Each option includes delivery, assembly, premium soil, the essential soil amendments, and a curated selection of plants tailored to your liking—all bundled into the price.

### Raised Garden Bed

**Ideal for those seeking a low-maintenance approach to gardening.**

**Description:**

Metal raised garden bed built to be 6.5 x 3.5 feet and 17 inches deep or tall.

This provides 23 square feet of growing space and can generally fit an average of 20- 25 plants.

**Benefits:**

- Reduce back strain with this elevated option, making gardening a comfortable experience.
- Plants thrive in a controlled setting, allowing you to manage soil biology and minimize weeds.

**\$1,880 per Bed**

### Rows Garden

**Perfect for those who enjoy hands-on soil engagement, prioritizing soil health for optimal plant growth.**

**Description:**

Cultivating plants directly in soil is an environmentally sustainable practice that supports soil health. This approach encourages the evolution of beneficial microbes in the soil, which aids in breaking down organic matter and increasing nutrient availability to plants.

**Benefits:**

- Promotes robust root development as roots can expand naturally and more easily.
- A soil-centric approach

**\$2,300 per Row**

## Step 3: Choose Your Growing Option

Each option includes delivery, assembly, premium soil, the essential soil amendments, and a curated selection of plants tailored to your liking—all bundled into the price.

### Fabric Grow Bag 10 Gallon

**Recommended for Small Spaces**

Better than any other container, garden bags prevent root bound plants and improve root systems through a technique called air pruning.

Contains 3-4 plants.

This Item is delivered as a complete unit. (no DIY option)

**\$180 - \$240**

### Custom Garden

**Ideal if you have a specific area for direct planting, working seamlessly with your property's unique design.**

Collaborate with our team to incorporate various materials, creating a customized garden that complements your surroundings.

**Price Varies**

# Our Materials

## Soil

Garden mix fully-composted manure and leaf matter blended with sphagnum peat moss, pine bark, native beneficial soil bacteria, native beneficial mycorrhizae, native humic acid, and native fulvic acid.

## Soil Amendments

Worm Castings, Sustane Fertilizer, EM Bokashi & Humic Acid.  
Cut harvest time, increase yields, grow food that's more nutritious.

## Plants and Seeds

Seeds, plugs, plants, full planting program regarding spacing options - mostly organic.
